MARS ET VÉNUS

3 volumes published & 1 activity book

Pitch :

Mars et Venus is the adaptation in 3 comic books of the world-famous essay by John Gray. It is composed of one-strip gags in which men and women are trying to put the therapist's advice into practice – but the results are not always as good as expected. Between pride and submission, one needs to find a middle ground. The female and the male language are quite different and it can be rather difficult to understand each other. If things seem to turn out wonderfully at the beginning, everyone's little flaws are soon going to become an overwhelming part of daily life. Prince charming will quickly become a good-for-nothing, while the sweet princess will soon turn out to have a vile temper...
